

Haugland Group LLC is an infrastructure services company that owns and operates entities which provide a wide range of energy and civil construction services. Our team brings decades of experience in the fields of engineering, project management, project finance and development, as well as design build, EPC and traditional contracting methods. Haugland Group companies have an aggregate bonding capacity of \$1.5 billion, and maintains a healthy balance sheet to support project cash flow needs.

We develop quality-driven, multi-disciplinary teams, capable of delivering optimal solutions for unique challenges. Sustainable construction practices allow Haugland Group to provide quality projects to its communities while remaining respectful of environmental and safety regulations without sacrificing efficiency.

OVERVIEW

GRACE INDUSTRIES LLC provides transportation infrastructure build-out including roadways, bridges, airports, and other civil-related construction for local municipalities, state agencies, and authorities. In addition, Grace offers underground utility construction and maintenance for gas, electric, water, and sewer.

HAUGLAND ENERGY GROUP LLC provides turnkey construction and maintenance for all phases of electrical power generation (traditional and renewable), transmission, distribution, substations and battery storage systems.

MIDNIGHT TRUCKING ENTERPRISES specializes in construction trucking services. Midnight Trucking offers total transportation and logistics solutions. Our specialized fleet allows for us to customize every move as needed. We pride ourselves in our modern fleet and ability to deliver on time.

INWOOD MATERIAL TERMINAL provides services to the greater New York construction industry with the recycling of debris, distribution of several types of aggregate, and stevedoring of specialty cargo through its marine terminals and facilities that are regulated by NYSDEC. Located in Inwood, Oceanside and Glen Cove, New York.

EASTERN UTILITIES SERVICES specializes in horizontal directional drilling (HDD), auger boring and micro-tunneling; working for government, municipal, industrial, and commercial customers to provide the highest level of trenchless installation.

HAUGLAND MARINE SERVICE/TOMKINS COVE offer a full suite of U.S. maritime services to various industries, including both inland and coastal construction, and offshore wind. Based in New York, HMS's specialized fleet of tug and barge vessels provide dredging operation support, coastwise towing, marine transportation, specialty cargo moves and lightering operation services. Tomkins Cove is an intermodal port facility situated on the Hudson River, 35 nautical miles north of New York Harbor, which can be built to suit as a fabrication and manufacturing facility, utilized as a staging area, or marshalling yard.

HAUGLAND VIRGIN ISLANDS manages the project development, as well as electrical, utility and civil construction and maintenance work performed in the Caribbean.
