hauglandgroup.us

Grace Industries

Grace Industries, part of the Haugland Group, delivers civil and transportation projects across the Northeast. It leads underground transmission for offshore wind and has rebuilt coastal infrastructure and modernized sewer systems for greater resilience.

Haugland Energy Group

Haugland Energy Group delivers high-voltage transmission, substations, and renewable solutions. Backed by an IBEW-trained team, they've completed 50+ substations and respond to 100+ storm events annually, with turnkey services including HVDC, energy storage, and cable work.

Midnight Trucking (MT)

Delivering 24/7 hauling services for construction materials and heavy equipment, Midnight Trucking operates from Maine to Florida. Our expansive fleet includes over 3,000 specialized trucks, ensuring rapid mobilization for both routine and emergency transport needs.

Inwood Material Terminal (IMT)

With marine terminals in Inwood, Glen Cove, and Oceanside, NY, IMT provides DEC-regulated facilities for recycling construction debris, distributing aggregate materials, and stevedoring specialty cargo. IMT operates over 20 barges, supporting large-scale energy and infrastructure projects.

Eastern Utilities Services (EUS)

Eastern Utilities Services (EUS) is a national leader in trenchless utility installation, specializing in HDD, microtunneling, and marine methods. Serving renewable energy, telecom, and civil sectors, EUS delivers precise, low-impact solutions using one of the nation's most advanced HDD fleets and in-house guidance teams.

Haugland Marine Service (HMS) / Tomkins Cove

Haugland Marine Service offers coastwise towing, marine transportation, dredging support, and lightering operations. Our fleet of tug and barge vessels can travel unrestricted throughout regional waterways, delivering essential materials and equipment across the Northeast and supporting offshore wind and renewable energy sectors.

Haugland Virgin Islands (HVI)

Haugland Virgin Islands (HVI), based in St. Thomas, emerged from Haugland Energy Group's hurricane response efforts and now leads key power, transportation, and civil projects. With 6,000+ poles replaced and 500+ miles of lines upgraded, HVI supports resilient rebuilding through local affiliates and FHWA-certified asphalt plants.
