

Altice Prime Maintenance Contract

Nassau and Suffolk County, Long Island

SECTOR: Telecom and Fiber

CLIENT: Altice

YEAR OF COMPLETION:

2001-Present

Single Mode and Multi-Mode
Fiber Optic

DESCRIPTION

Eastern Utilities provides manpower and equipment on an "as needed" basis to address system upgrades and failures. Upon receiving work orders for facilities in need of repair or upgrade, they survey the job site, obtain municipal permits, order 811 markouts, install new underground or aerial lines as specified, splice new lines into the system, and verify that the system remains operational.

These work orders range from localized distribution lines of less than 100 feet to transmission cables spanning thousands of feet, covering Nassau and Suffolk counties on Long Island.
